## Colorcraft

- Animation
- Game Graphics
- Slide Shows
- Cartoons and Stories
- Rolling Displays
- Graphs and Charts

Colorcraft is a powerful graphics animation program for business, education, or fun. Colorcraft lets you create designs on the screen using the graphics keys and colors on the Commodore Keyboard. You can copy your screens and make slight changes to create an electronic flipbook. Using the RUN command you can set your designs in motion for real animation and lots of fun.

CC1 - CV20 (cass) - \$24.95  
CC1 - CC20 (64 cass) - \$24.95  
CC1 - DC64 (64 disk) - \$29.95

## Inside Basic

**PROGRAMS WITH THE WORKS** - Writing good programs is not an easy task. Inside Basic, a series of well documented programs, includes program overviews, suggested changes, line-by-line descriptions, listings, and variable charts. Learn the workings of a well-designed program in order to create your own. There's something for everyone - games, business applications, programming aids, and educational programs. (Commodore 64/VIC 20 with 8k expansion)

### **BLS-GB01/Number Jotto - \$14.95**

This is the old oriental number guessing game where you try to deduce your opponent's four digit number. Up to four players makes this an ideal strategy game for the entire family.

### **BLS-GA03/Kentucky Derby - \$19.95**

All the fun of a day at the races including hi-resolution graphics and sounds. Bet on your favorite horses and win big bucks! You can even change the names of the horses for more fun.

### **BLS-BB01/Form Generator - \$19.95**

The preparation of forms can be a mess. With this useful program you can generate anything from labels to invoices quickly and easily.

### **BLS-EB01/Quiz Me - \$14.95**

This is the ideal program to demonstrate the computer's ability to present materials, ask questions, and score you. After learning this one, you can make a quiz for any subject.

### **BLS-EB02/Word Match - \$14.95**

This is a vocabulary building program you can customize to teach any subject. Learning is always more fun when you can make a game out of it.

### **BLS-EI03/Math Graph - \$14.95**

Learning math becomes much easier with this graphing program that transforms mathematical equations into perfect graphs.

Also in the series:

**BLS-BI02/Appointments - \$19.95**  
**BLS-BA03/Task Organizer - \$24.95**  
**BLS-PB01/Cassette Filer - \$14.95**  
**BLS-PI02/Diskette Filer - \$14.95**  
**BLS-PI03/Menu Magic - \$14.95**

# Atari 400/800/1200

## Home-Calc

Home-Calc is a powerful, inexpensive spreadsheet for home and business calculations. You can enter numbers, labels, or formulas in each cell. Home-Calc allows you to add, subtract, multiply, divide, use the exponential guide, sum, and recalculate. The diskette version also features a replicate command. Maximum spreadsheet size is 510 cells for the 48k diskette version. (Disk version requires 24k memory; cassette requires 16k memory.)

HC-CA (cass) \$39.95  
HC-DA (disk) \$29.95

## Vektron

Vektron is a fast-playing arcade-stye video game of skill for two players (requires joysticks). Control a hovercraft in a space continuum trying desperately to avoid the deadly vapor trail. Dodge new stars and planets as they form around you. Watch out for alien influences which can use MINDCONTROL to take over your craft. For ages 5 - adult, easy to learn and play - no adult supervision required.

VT-CA (cass) \$14.95  
VT-DA (disk) \$19.95
